A preliminary review of the project indicates that the application, as proposed, appears to be in accordance with the Town zoning code. The project designation manual matrix requires building alterations that impact the façade and architectural styles be heard by ARCOM. The removal of the parapet wall, cast stone balustrade and shutters is a departure from the previously approved plans. In addition the installation of a new entry gate will be visible from the right of way and requires board approval.

CONCLUSION:

This application is presented to the Commission to consider whether all of the criteria in Sec. 18-205 have been met. Approval of the subject project will require one (1) separate motions to be made by the Architectural Review Commission:

- (1) that the overall design of the project is in accordance with the criteria provided below, subject to any imposed conditions.
