RE:

Rehabilitation of Pumps D-16 and D-18

Town of Palm Beach - Direct Purchase of Mechanical & Electrical Equipment

 CMA Project No.:
 431.017

 TPB Project No.:
 Bid No. 2020-04

INTRODUCTION:

On January 10th the Town of Palm Beach received bids from Contractor's for Bid Number 2020-04: Rehabilitation of Pumps D-16 and D-18. This project entails the replacement of the pumps, pump canisters, discharge pipes, and related electrical equipment for the D-16 pump station (western end of Jungle Road) and D-18 pump station (western end of El Brillo Way). In addition, there are non-mechanical elements of the work including structural repairs and additions to concrete sea walls, placement of rock rip-rap to prevent erosion in the Lake Worth Lagoon and minor landscaping and paving site work. The work was advertised with the intention of selecting the lowest bid Contractor and issuing a Purchase Order by April 1st and beginning field work on May 1st. This schedule allowed for the Contractor to assume the responsibility of purchasing all equipment directly as part of their scope of services and bid pricing.

Subsequent to the review of the submitted bids, it was determined that a change in the project requirements would necessitate the design of the project be modified and re-advertised thereby restarting the bid and award process. The effect of this change meant that the selected Contractor would not be issued a Purchase Order early enough to order the mechanical and electrical items that are not in stock or readily available. Chen Moore recommends that to maintain the schedule for construction within the off-season, the Town should direct purchase "long lead" items such as the pumps, pump cans and electrical control equipment. This will allow for the manufacturers to construct, test and ship the long lead items on a parallel schedule with the Town's bid and award process. Considering this approach, the bid documents (contract, design plans and technical specifications) have been modified to clearly delineate the responsibilities of the Town and the Contractor with respect to purchasing the equipment (Town), accepting delivery of the equipment (Contractor), and installing the equipment (Contractor). The following items are recommended for direct purchase by the Town.

- 1. Flygt PL7030/640 38HP Pumps (4)
- 2. Flygt 316L Pump Tubes (4)
- 3. Flygt 316L Wall Thimbles (4)
- 4. CC Control Corp Duplex Pump Station Control Panels (2)
- 5. CC Control Corp Wet Well Level Transducers (2)
- 6. CC Control Corp Wet Well Floats (2)

The total cost of all long lead items recommended for direct purchase is \$489,382.78. The direct purchase price for all items listed includes the cost of submittal documentation, manufacturer's testing, warranties and other related services. See attached exhibits for a detailed breakdown of item pricing.
