SETTLEMENT AGREEMENT

THIS SETTLEMENT AGREEMENT (the “Settlement Agreement” or “Agreement”) is entered into between the Town of Palm Beach (the “Town” or “Palm Beach”), and The 2000 Condominium Association, Inc. and The 2100 Condominium Association, Inc. (the “Condominium Associations”) (collectively, the “Parties”) with an effective date as described herein.

WHEREAS, Palm Beach is a municipal corporation and body politic within the State of Florida located in Palm Beach County, Florida.

WHEREAS, Condominium Associations are representing owners of properties that border on the Atlantic Ocean in Palm Beach County and are within the jurisdiction of the Town. The Condominium Associations’ contiguous properties extend from the state-labeled Reference Monuments (“R”) R-116+990 to R-118+740 along the shoreline.

WHEREAS, Palm Beach and the State of Florida Department of Environmental Protection (“DEP”) and the Florida Fish and Wildlife Conservation Commission have entered into a Palm Beach Island Beach Management Agreement (“BMA”) to coordinate beach management activities within the BMA Area as defined in Article C of the BMA pursuant to Sections 161.101, 403.061, and 403.0752, Florida Statutes.

WHEREAS, on or about December 16, 2020, Palm Beach submitted to DEP an Individual Project Approval Permit Number: 0328802-010-BMA (“IPA”) to re-nourish a previously authorized beach template by placing beach-compatible sand from approximately R-119 to R-127. The proposed project includes dredging approximately 495,000 cubic yards of beach compatible sand from the authorized borrow area (“South Borrow Area 2”) and placement along an approximately 1.6-mile segment of beach between FDEP monuments R-119 and R-127.

WHEREAS, the Condominium Associations have submitted objections to Town and DEP regarding the IPA and have indicated that absent resolution of such objections they would file a petition for an administrative proceeding under sections 120.569 and 120.57 of the Florida Statutes, challenging that the proposed regulatory agency action on the IPA does not comply with the terms of the BMA and applicable statutory provisions (the “Dispute”).

WHEREAS, the Parties desire to settle the Dispute and to avoid future litigation on these issues because it is in the best interest of both, without any admission of error, liability, or wrongdoing.

WHEREAS, the Parties have identified a mutually beneficial solution, without attribution of cause, and recognize that it is to their mutual benefit, and the benefit of the public, to work cooperatively to implement that solution.

WHEREAS, the parties have settled upon a solution on engineering, permitting, funding, monitoring, management, maintenance and renourishment of Condominium Associations’ and

Palm Beach's beaches.

WHEREAS, this settlement agreement is intended to and shall resolve all issues raised in the Dispute or related to the subject matter of the Dispute; however, this Agreement shall not prevent or prohibit the Condominium Associations from objecting to or legally challenging other or future Town projects or agency approvals not included within the terms of this IPA

NOW THEREFORE, in consideration of the mutual covenants and conditions contained herein and for other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, the Parties agree, as follows:

A. Recitals. The foregoing recitals are incorporated herein by reference; provided however, that to the extent any conflict may exist, the terms of the Agreement below shall take precedence over the recitals.

B. Effective Date. This Agreement shall become effective on the date it is executed by all the Parties. The last date of execution by all the Parties shall be known as the "Effective Date" of this Agreement.

C. Definitions. The terms used in this document are defined as follows:

1. "Agreement" or "Settlement Agreement" means this agreement to settle the Dispute as of the Effective Date.

2. "Claims" means all issues raised in the Dispute or related to the subject matter of the Dispute.

3. "Renourishment Project" means a renourishment project undertaken by Palm Beach as described in this Agreement and continuing for a period of up to five (5) years as required herein subsequent to the dredge event authorized in the IPA. Any Renourishment Project shall also include vegetation, maintenance and monitoring with appropriate dune vegetation to stabilize dune sand renourishment. The Town shall be responsible for all costs of such Renourishment Project, absent obtaining funds from sources other than the Condominium Associations.

4. "Quarterly Beach Monitoring" means the monitoring in January, April, July, and October pursuant to the physical monitoring plan in the BMA and IPA for a period of five (5) years following the dredge event authorized in the IPA. The Town shall be responsible for all costs of such Quarterly Beach Monitoring, absent obtaining funds from sources other than the Condominium Associations.

D. Settlement Terms. The Parties agree to settle the Dispute upon the following terms:

1. The Town shall place the sand dune nourishment at the Condominium Associations' properties ~~as shown in the IPA plans~~ by May 1, 2021 pursuant to the BMA and as described and depicted in the Town's Bid Documents for Bids 2020-01 and 02, 2020-07 and 2020-08 and contracts pursuant to those Bid Documents. This dune placement shall consist of

fifteen thousand cubic yards of sand identified in the IPA stockpile for this site and shall be consistent with Attachment C of the BMA. All Renourishment provisions contained in this Agreement are supplemental to ~~the~~this required ~~IPA~~ sand placement at the dunes and beach owned by the Condominium Associations.

2. Reduction in Dredge Volume. The Town shall dredge no more than 570,000 cubic yards of beach compatible sand from the authorized borrow area (South Borrow Area 2) which is approximately fifteen percent (15%) more than the allowable placement volume, equal to 150% of the FDEP Project's IPA requested placement quantity of 495,000 CY.

3. Revision of Dredge Area. The dredge area shall be further revised so it is 160 feet offset to the East and 620 feet to the South from the revised IPA submission as depicted on Attachment "A" attached hereto and made part hereof.

4. As part of the IPA project, the Town shall place a minimum of fifteen thousand (15,000) cubic yards of sand at the Phipps Ocean Park property, which sand shall be stockpiled and dedicated to ~~an initial~~a Renourishment Project for the Condominium Associations pursuant to the terms of this Agreement. This sand volume shall be in addition to the volume required to perform the 2021 dune nourishment pursuant to Paragraph 1, above.

5. Baseline Condition Condominium Associations Beach Profile. The relevant Baseline profile is depicted on Attachment "B" and Attachment "C", attached hereto and made part hereof.

6. Quarterly Beach Monitoring. Commencing on the last day of the Quarter (January, April, July, or October) following 90 days after completion of the work under the IPA, and for the following five (5) years, the Town shall conduct annually four Quarterly Beach Monitoring events to compare the current Condominium Associations' Beach Profile Volume to the Baseline Condominium Associations Beach Control Volume Profile (Attachment B) to determine whether a Renourishment Project is necessary. The Quarterly Beach Monitoring shall be taken at 500' intervals or at the intermediate monuments along the shoreline facing the Atlantic Ocean from R-116.5 to R-119 along the beach. These profiles shall be consistent with the Town's annual monitoring surveys typically performed along this shoreline segment. The Town shall share the Quarterly Beach Monitoring data with the Condominium Associations and their consultant(s) during the process of analyzing the data and developing the report, including drafts, and the report in final form. Within fifteen (15) days of receipt of a report on the Quarterly Beach Monitoring data, the designated staff or consultants of the Parties shall meet to review the data and formulate any required action plans regarding the need for a Berm-Dune Reconstruction Project based on the project Trigger provisions described below.

7. Trigger of Renourishment Project. There shall be two timeframes for consideration of a Trigger Event as defined in this paragraph. If a dune nourishment project is triggered within three (3) years from the IPA dredge event, the Town shall place the stockpiled fifteen thousand (15,000) cubic yards of sand as dunes and beach at the Condominium Associations' properties. If Monitoring data and the terms of this Agreement trigger a second renourishment event during years 3 to year 5 of this Agreement, the Town agrees to place an additional minimum of 15,000 cubic yards of sand on the Condominium Associations' beaches

from any appropriate borrow or upland source. A Renourishment Trigger Event shall be when the current volume loss of the Condominium Associations Beach Control Profile demonstrates beach erosion of fifteen cubic yards per foot (15 CY/Ft) as compared to the Baseline Condition Condominium Associations Beach Profile within a two-year period, regardless of the cause whether man-induced or natural, including weather events. Upon occurrence of this Trigger Event, the Town shall commence and complete at Town's expense a Berm-Dune Reconstruction Project within (90) days based on the first available period outside the sea turtle season/dates. The Baseline Condition Beach Profile shall be based on the August 2020 profile survey from the Town and the constructed Berm Dune Template as permitted (5 cubic yards per year annualized loss rate and 10 cubic yards per foot) shall require a review of the profile data and an action plan. Any sand placed as a renourishment shall, to the extent possible be tapered two hundred and fifty (250) feet north and south of the Condominium Associations' properties to stabilize the beach/dune sand placement

8. Renourishment Project. Each Renourishment Project pursuant to the conditions and terms described in this Agreement shall consist of the Town Placing at least 10 (ten) Cubic Yards per Linear Beach Foot consistent with the BMA onto the Condominium Association's Beach with appropriate dune vegetation plantings, monitoring and maintenance to success criteria for survival and beach stability. The Town agrees to stockpile a minimum of fifteen thousand (15,000) cubic yards of sand at Phipps Ocean Beach Park during the performance of the IPA, which sand shall be dedicated to and available for the purpose of any Renourishment Project required pursuant to the terms of this Agreement. If additional sand is needed during the term of this Agreement for additional Renourishment Projects, then the Town shall provide such sand solely at its expense, including from an upland source.

9. In addition to the actions to be performed by the Town listed above, the Town agrees to use all best efforts to pursue expanding the beach placement template for the Phipps Ocean Park project pursuant to the BMA to include nourishment of the beaches at the Condominium Associations' properties. This commitment includes using resources and best efforts to obtain any necessary approvals from the Florida Department of Environmental Protection and from the U.S. Army Corps of Engineers, including any modification to an Environmental Impact Statement.

10. In addition to the Terms of the Agreement stated above, and pursuant to the BMA provisions regarding the "Sloan's Curve hotspot", which includes the limits of the Condominium Associations' beaches, the Town agrees to coordinate with the Condominium Associations to pursue permitting for a structural solution as a pilot project to stabilize the shorelines for the Condominium Associations. This coordination may include serving as advocate for and permit applicant or co-applicant for permits, approvals, and other permissions from state and federal agencies. The Town's coordination would also include providing necessary sand fill for any permitted project that may include structures for shore stabilization.
