STAFF ANALYSIS

The application is presented to the Commission to consider whether all the criteria in section 54-122 have been met. A preliminary review of the project indicates that the application, as proposed, appears to be consistent with the above-mentioned sections of the Town zoning code.

The proposal extends the second-story floor plan over the existing one-story staff quarters at the rear of the home. The expansion adds approximately 242 SF of functional space on the east side of the building to create additional indoor living space, in the form of an additional bedroom and a full bathroom. The applicant has made modifications to the design based on comments from the Town's preservation consultants and they have found the addition to be compatible with the home. The construction of a second story addition does not require zoning relief or town council approval and therefore can be approved in one motion.
