

## Summary

There are five traffic issues and mitigation strategies under discussion, these include:

- Traffic congestion on A1A (South Ocean Boulevard) around Mar a Lago. This area is impacted by Mar-a- Lago events, PM rush hour, construction projects north and south of Mar-a-Lago, bridge going up and bridge malfunction. On December 4, Chief Caristo, Major Scanlan, Lt. Watson and Maggie Zeidman met with the Secret Service, the Mar-a-Lago Event Coordinator and Harvey Oyer to discuss what went wrong on the two recent occasions where traffic was at a standstill and how to mitigate the potential for this happening in the future.
- Changes to roadways for safety: one way east on Sunset Avenue and right turn only from Brazilian onto South County Road.
- Pending change to the 100 block of Barton Avenue to mitigate traffic backup on North County Road. Change is to go into effect on 12/15/2023.
- Flagler Memorial (North) bridge now opens once an hour during rush hour and there is potential for the same on the Middle and Southern bridges.
- Synchronization of lights in Town and with West Palm Beach.
