RE: 10 Tarpon Isle, Palm Beach, FL

To whom it may concern:

The office of Fernando Wong Outdoor Living Design is seeking permission to renovate the landscape at 10 Tarpon Isle. Currently there are no architectural renovations.

The homeowners recently purchased the property, and the two primary design goals are safety for their young children and privacy for the family.

The existing property has little landscape making the front, back, and side yards visible to boaters and surrounding neighbors. Our firm is asking to install a safety fence around the perimeter of the property and privacy hedge to achieve the client's concern and design goals.

Historically the island was full of ficus and pines. It appears that the only original trees are the two banyan trees that are to remain at the existing motor court.

In regard to hardscape, the original pool will remain, along with the existing driveway. New hardscape is being proposed in the rear yard for site circulation and to create a site programming featuring art works and viewing terraces and the southeast and southwest corners.

Kind Regards,
Jacqueline Bayliss, RLA
